CropConnect

Local sourcing, done for you.
We make restaurant menus more profitable.

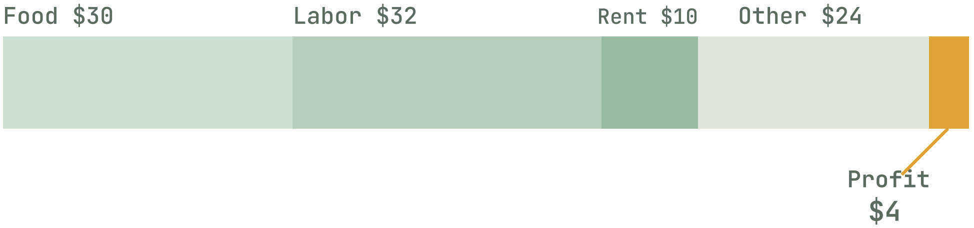
Restaurant supply · Agent-run · Pre-seed

Problem

Thin margins, rising expectations, and no time to source. The numbers all point the same way.

- Independent full-service restaurants net just 3 to 5 percent. Margins are razor thin.
- Food and labor already eat about 60 cents of every dollar, so little is left to cut.
- 38 percent of diners are more likely to choose a restaurant that offers locally sourced food.
- Six in ten consumers care where their food comes from, and 55 percent want the story behind it.
- Diners increasingly judge a kitchen by its sourcing, yet doing it by hand is a second full-time job most skip.

WHERE EVERY $100 OF REVENUE GOES



The whole business runs on the last $4.

Product

An AI agent runs local sourcing end to end. You name one ingredient. It does the rest.

- A named-local dish charges about 20% more, and 38% of diners choose a restaurant for local sourcing.
- 55% want the story behind their food. The agent writes the provenance for every dish.
- You do two things: ask, and put it on the menu. The agent runs the other eight.
- Set up in about 10 minutes, first item free. A live board shows every step.

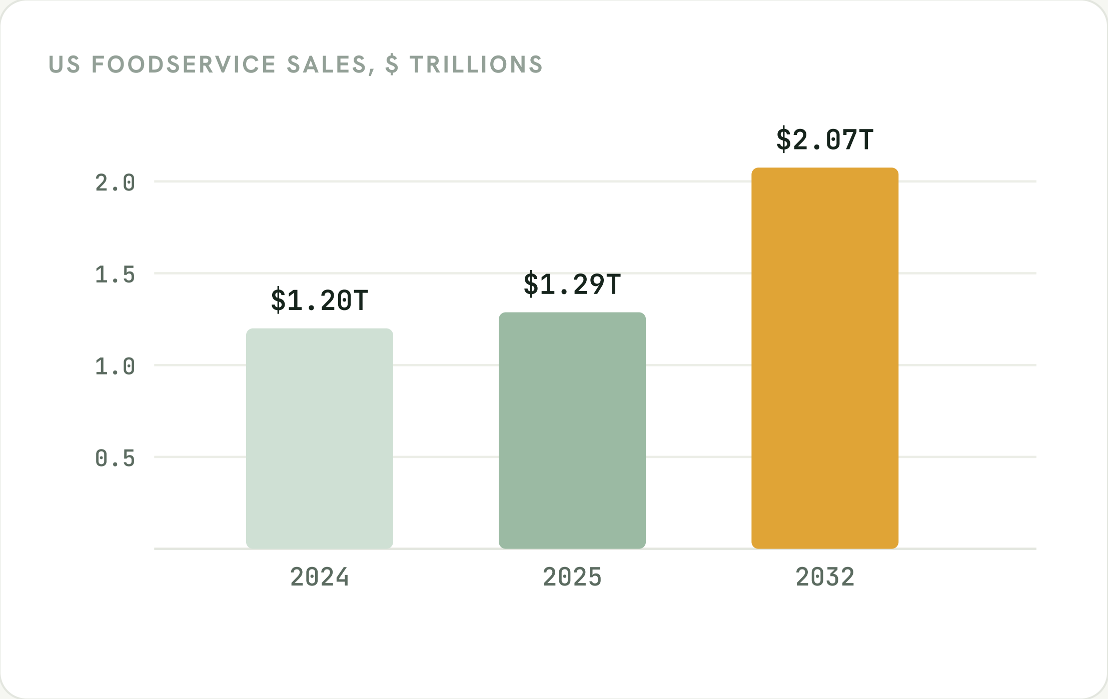
THE PIPELINE

- ✓ **Request** — you ask once
- ✓ **Farm match** — vetted and ranked
- ✓ **Agreement** — drafted for you
- 4 **Delivery** — weekly, on us
- 5 **On the menu** — earning margin

Opportunity

US foodservice is a $1.1T market on track to roughly double by 2032. Full-service kitchens are our wedge.

- TAM: $1.1T US foodservice across 1M+ outlets.
- SAM: 34,000+ full-service restaurants where local moves the check.
- SOM: the Indianapolis area first, then expand city by city.
- We bill the service layer, so revenue recurs and grows per location.



Business model

Food passes through at cost. We earn a recurring monthly fee that scales with the items and the volume we run, never per farm and never a cut of sales.

FEE PER ACCOUNT, MONTHLY · MID-SIZE KITCHEN

LINE ITEM	UNIT	MONTHLY
Base service	1	$299
Items live	3 × $199	$597
ARPA (3 items)	–	$896
Annual run-rate	×12	$10.7K
High-volume account	6 × $349	$2.4K

RECURRING REVENUE BY STAGE

METRIC	PILOT	YEAR 1	YEAR 2
Accounts	10	50	200
ARPA / mo	$896	$896	$950
MRR	$9K	$45K	$190K
ARR	$108K	$538K	$2.3M
Food markup	$0	$0	$0
Cut of sales	$0	$0	$0

Competition

COMPETITORS

Market Wagon — Indianapolis local food marketplace. Direct to consumer and fragmented; the kitchen still has to source.

Sysco · US Foods — Broadline distribution. No local story, and the markup hides in the food.

Doing it yourself — Calling farms and chasing trucks. The full-time job we take away.

PRECURSORS

SOFTWARE AND AI · ASSET-LIGHT

Choco — restaurant supply software	$1.2B val
Afresh — AI for fresh ordering	$148M raised

DELIVERY AND LOGISTICS · CAPEX HEAVY

Misfits Market — DTC produce	~$2B val
Imperfect Foods — produce boxes	~$229M raised
Good Eggs — local grocery	~$190M raised

B2B PRODUCE MARKETPLACES

ProducePay — produce trade	$300M+ raised
Full Harvest — surplus produce	$45M raised

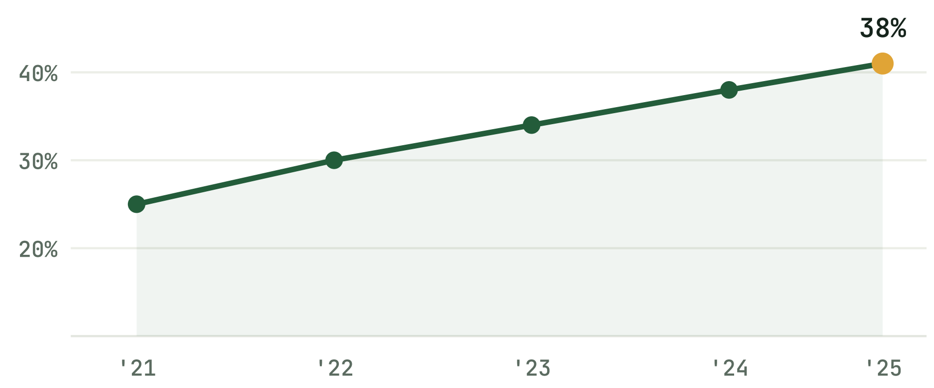
Software and AI earn the valuations. Trucks and warehouses burned the cash. We are the software side.

Why now

Diner demand for local has climbed for years, and AI agents finally make true done-for-you service affordable.

- 38 percent of diners are more likely to choose a restaurant that offers locally sourced food.
- Demand for ingredient transparency rose from 69 percent in 2018 to 76 percent in 2023.
- 68 cents of every local dollar stays in the community, versus 43 cents otherwise.
- AI agents make true done-for-you service affordable for the first time.

DINERS MORE LIKELY TO CHOOSE A RESTAURANT WITH LOCAL FOOD



The ask

A small SAFE to win the first Indianapolis customers. Almost all of it is sales.

$50K–$100K raise | SAFE · post-money | **$4M** cap | **20%** discount | MFN | converts at the priced seed

- Enough to land the first 10 to 15 kitchens and the farms that supply them.
- The cost to expand is sales. A part-time insider and warm intros do the work.
- We run sourcing and delivery at cost for month one, so operating costs stay small early on.

USE OF FUNDS · $75K MIDPOINT

WHERE IT GOES	AMOUNT	SHARE
Sales and customer acquisition	$60K	80%
Operating costs, run at cost early	$11K	15%
Legal and admin	$4K	5%
Total	**$75K**	**100%**
