Local sourcing, done for you.
We make restaurant menus
more profitable.

Restaurant supply

Agent-run

Pre-seed

Problem

Thin margins, rising expectations, and no time to source. The numbers all point the same way.

- Independent full-service restaurants net just 3 to 5 percent. Margins are razor thin.
- Food and labor already eat about 60 cents of every dollar, so little is left to cut.
- 38 percent of diners are more likely to choose a restaurant that offers locally sourced food.
- Six in ten consumers care where their food comes from, and 55 percent want the story behind it.
- Diners increasingly judge a kitchen by its sourcing, yet doing it by hand is a second full-time job most skip.

WHERE EVERY \$100 OF REVENUE GOES

The whole business runs on the last \$4.

Product

An AI agent runs local sourcing end to end. You name one ingredient. It does the other eight jobs and shows the work on a live board.

- You do two things. Ask, and serve.
- Set up in ~10 min. First item free.
- Backup farms cover shortfalls.

Opportunity

US foodservice is a \$1.1T market on track to roughly double by 2032. Full-service kitchens are our wedge.

- TAM: \$1.1T US foodservice across 1M+ outlets.
- SAM: 34,000+ full-service restaurants where local moves the check.
- SOM: the Indianapolis area first, then expand city by city.
- We bill the service layer, so revenue recurs and grows per location.

US FOODSERVICE SALES, \$ TRILLIONS

Business model

Food passes through at cost. We earn a recurring monthly fee per item we run, never per farm. We handle the farms for free. The model on one sheet.

FEE PER ACCOUNT, MONTHLY

LINE ITEM	UNIT	MONTHLY
Base service	1	\$149
Items live	3 × \$30	\$90
ARPA (3 items)	—	\$239
Annual run-rate	×12	\$2,868
12-month term	-20%	\$191

RECURRING REVENUE BY STAGE · 3 ITEMS EACH

METRIC	PILOT	YEAR 1	YEAR 2
Accounts	10	50	200
ARPA / mo	\$239	\$239	\$250
MRR	\$2.4K	\$12K	\$50K
ARR	\$29K	\$143K	\$600K
Food markup	\$0	\$0	\$0
Cut of sales	\$0	\$0	\$0

Competition

COMPETITORS

Market Wagon — Indianapolis local food marketplace. Direct to consumer and fragmented; the kitchen still has to source.

Sysco · US Foods — Broadline distribution. No local story, and the markup hides in the food.

Doing it yourself — Calling farms and chasing trucks. The full-time job we take away.

PRECURSORS

SOFTWARE AND AI · ASSET-LIGHT

Choco — restaurant supply software	\$1.2B val
------------------------------------	------------

Afresh — AI for fresh ordering	\$148M raised
--------------------------------	---------------

DELIVERY AND LOGISTICS · CAPEX HEAVY

Misfits Market — DTC produce	~\$2B val
------------------------------	-----------

Imperfect Foods — produce boxes	~\$229M raised
---------------------------------	----------------

Good Eggs — local grocery	~\$190M raised
---------------------------	----------------

B2B PRODUCE MARKETPLACES

ProducePay — produce trade	\$300M+ raised
----------------------------	----------------

Full Harvest — surplus produce	\$45M raised
--------------------------------	--------------

Software and AI earn the valuations. Trucks and warehouses burned the cash.
We are the software side.

Why now

Diner demand for local has climbed for years, and AI agents finally make true done-for-you service affordable.

- 38 percent of diners are more likely to choose a restaurant that offers locally sourced food.
- Demand for ingredient transparency rose from 69 percent in 2018 to 76 percent in 2023.
- 68 cents of every local dollar stays in the community, versus 43 cents otherwise.
- AI agents make true done-for-you service affordable for the first time.

DINERS MORE LIKELY TO CHOOSE A RESTAURANT WITH LOCAL FOOD

The ask

Raising a \$50K to \$100K SAFE to onboard the first restaurants and farms in Indianapolis. Almost every dollar buys live customers.

- \$50K to \$100K SAFE, with 95 percent spent landing live customers.
- A part-time insider with restaurant and farm relationships makes onboarding warm intros, not cold outreach. The first cohort is close to guaranteed.
- We run sourcing and delivery at cost for month one, so a kitchen has no reason to say no.
- Goal: 10 to 15 paying restaurants and the farms that supply them, live with proven margin lift.

USE OF FUNDS · ~\$75K MIDPOINT

WHERE IT GOES	SHARE	AMOUNT
